

Assignment Submission Guidelines

In this course, students are required to work on weekly group assignments. The purpose of this document is to provide formatting guidelines for the submissions.

Group formation

- Form **groups of three or four members**.

How to submit

- Exercises will be published on Whiteboard after Monday's lecture.
- The deadline for each exercise will be Tuesday at 10:15 am of the following week (unless otherwise stated).
- Submission can be done either via Whiteboard or by handing in your solutions at the exercise session by the specified deadline.
- It is sufficient for one member of a group to submit the solutions on behalf of the other group members. **Please make sure that all group members' names are written on the front page of your submission.**
- Late submission will NOT be considered.

What to submit

- Your solutions to the exercises should be documented in a single PDF file.
- Include the Python source code you used to solve programming exercises as a separate .py file or Jupyter notebook. Include also the output of the program as part of your submission.

For Python coding exercises

- Use **Python 3.x**
- Basic Python scripts or Jupyter notebooks are allowed.
- Comment your code to describe its functionality and explain your reasoning.

For theoretical exercises

- Each submission must contain a **single PDF document**.
- Red color is not allowed.

Should you have any queries regarding the submission of assignments or your marked assignments, please contact **Vesa Kaarnioja** at: vesa.kaarnioja@fu-berlin.de
